

Electric Service Schedule 9

General Service Large

APPLICABILITY: Applicable to all single-phase and three-phase alternating current electric service not provided for under other schedules, at distribution voltages below 600 volts, served from existing facilities of suitable characters and capacity at one point of delivery for all approved electrical uses required on the premises.

RATES: Monthly billings shall equal the sum of the following charges:

	Effective July 1, 2008	Effective October 1, 2008	Effective October 1, 2009	Effective October 1, 2010	Effective October 1, 2011
1. Customer Charge Per Meter, Per Billing Period:	\$18.33	\$19.21	\$19.79	\$20.38	\$20.99
2. Energy Charge All kWh, per kWh:	\$0.0381	\$0.0399	\$0.0411	\$0.0423	\$0.0436
3. Demand Charge Peak Season (April to September, inclusive) All kW, per kW:	\$11.50	\$12.05	\$12.41	\$12.78	\$13.16
Off-Peak Season (October to March, inclusive) All kW, per kW:	\$10.11	\$10.59	\$10.91	\$11.24	\$11.58

MINIMUM CHARGE: The minimum charge for service hereunder shall be the customer charge plus appropriate energy and power charges.

SUPPLY COST ADJUSTMENT: All monthly bills shall be adjusted in accordance with Electric Service Schedule 30.

SPECIAL CONDITIONS:

1. The customer's billing demand may, at the City's option, be adjusted when the customer's power factor is less than 90 percent lagging, as determined by measurement under normal load

(continued)

Electric Service Schedule 9 - Continued

conditions. The measured kilowatt load for determination of billing demand will be adjusted by multiplying the recorded demand by 90 percent and dividing by the measured power factor.

2. The billing demand will be the average kilowatt load measured during the fifteen-minute period of maximum use during the month, to the nearest whole kilowatt.
3. Any standard available distribution voltage, single or three-phase, but not more than one standard voltage, will be supplied under this schedule.
4. The City may require a contract for service under this schedule for a period of not less than one year.
5. Self-contained metering will be required under this schedule for all service entrances with main breakers of 320 amperes or less, except when justifiable extenuating circumstances apply and are approved by City before the installation is made.
6. This rate schedule shall apply to those general service customers that have monthly metered peak demands equal to or greater than 30.0 kW in at least seven months of the most recent continuous 12 month period, or that have a monthly metered peak demand equal to or greater than 35.0 kW in any single month during the same twelve month period. The maximum monthly metered peak demand served under this rate schedule is less than 3,000 kW. (See Rate Schedule 3 or 15 for commercial customers not meeting these criteria.)
